

EnGenius Technologies Wireless-N Gaming Router Receives “Approved Hardware” Award from Techware Labs

*ESR9855G Multimedia Enhanced Wireless N Gaming Router with Gigabit Receives Praise for
Speed and Features*

COSTA MESA, Calif. – Oct. 18, 2011 – [EnGenius® Technologies](#), Inc., the leader in long-range [Wireless-N](#) networking solutions for homes and businesses, today announced [TechwareLabs](#) has awarded the ESR9855G Multimedia Enhanced Wireless N Gaming Router with Gigabit its Approved Hardware Award.

In a review published on the [TechwareLabs](#) website, product reviewer Ben Weber praised the ESR9855G for its features and speed. “The EnGenius Wireless 300N Gaming Router has all of the features needed for a gaming setup or LAN party. From its gigabit switch to its speedy 300Mbps wireless N rate, this router stacks up with most high end media/gaming routers.” Weber continued, “This router has both the wired and wireless speeds needed for a gaming hub or LAN party without sacrificing the software to support it.”

“We are particularly excited about this award because it validates our efforts to deliver to the market wireless infrastructure solutions that provide the performance and features of high-end products at a price point that makes it affordable for consumers and small businesses,” explained Carina Tsai, Product Manager at EnGenius Technologies. “The ESR9855G is the ideal high-performance wireless network solution for today’s connected home. By delivering whole-home coverage with secure, reliable, high-speed wireless access, our products enable the growing array of network-connected applications in homes and small businesses to enhance productivity and efficiency, and maximize consumers’ in-home entertainment options.”

About the EnGenius ESR9855G Multimedia Enhanced Wireless N Gaming Router

The EnGenius Technologies ESR9855G Multimedia Enhanced Wireless N Gaming Router with Gigabit is designed to provide superior range and fast wireless speeds. The ESR9855G incorporates wireless 802.11n technology to deliver the best range and speed, and a four-port Gigabit Ethernet switch to provide ultra-fast connectivity between wired devices and eliminate bottlenecks between wired and wireless devices.

To maximize the enjoyment of multimedia content and online gaming, the ESR9855G integrates StreamEngine™ technology and 802.11e QoS (WMM) to detect and prioritize VoIP, gaming and video packets to optimize multimedia streaming for gaming consoles, HD TV, music, VoIP, and other home entertainment applications.

The ESR9855G offers a host of security features including: secure push-button connectivity, policy-based parental controls for safe browsing, Wi-Fi Protected Access (WPA2/WPA), SPI firewall, and wireless MAC address filtering. For ease of management, the ESR9855G features a web-based GUI, power saving management and auto-firmware recovery.

An embedded 3dBi antenna provides superior coverage and range and an external connector enables users to upgrade the antenna to customize the range and radiation patterns to meet the unique requirements of the user.

The EnGenius Technologies ESR9855G Multimedia Enhanced Wireless N Gaming Router is available in North America via authorized EnGenius Technologies distributors and value-added resellers, at a list price of \$99.99.
