Quick Installation Guide

Wireless Management L2 Switch

4 Management Switch Setup

A) Open a web-browser on any computer in the address bar of the web browser: http://192.168.0.239

B) A login screen will appear. By default, username is admin and the password is admin. Click the OK button to logon the Wireless Management Switch and then click Login.

C) To manage the Managed AP(s) select the desired Managed AP(s) by checking the boxes and then click Add.

D) You will be prompted to enter IP Address range for the Managed AP(s) (Port-1) and Password. Port-1 is the port ID of the Switch. (e.g. Port-1: 1, Port-2: 2, etc.) Enter these values. After entering the Configuration settings, please refer to the Wireless Management Switch User Manual for more information on configuration settings.

E) Click on the Setup button that is the bottom right corner of the page.

5 Device Management

Locating Wireless Managed AP(s)

A) Click on the Device Management icon under Access Points. The wireless Managed AP(s) connected to the network is displayed in the left side of the screen. Under the Access, click on the Managed AP(s) to select the desired device(s).

B) To manage the Managed AP(s) select the desired Managed AP(s) by checking the boxes and then click Add.

Managing Wireless Managed AP(s)

The Managed AP(s) that are powered on under the Managed AP(s) list can be configured under the Managed AP(s) Configuration settings. Please refer to the EnGenius Wireless Management Switch User Manual for more information on configuration settings.

Managing Wireless Managed Switch

For the Setup Switch configuration, click the Setup Switch tab or click on the Switch under the EnGenius Wireless Management Switch User Manual for more information on configuration settings.

6 IP Address Configuration

Connecting to the Switch

A) The Managed AP(s) Power Card to the Switch and plug in the Ethernet cord to the Ethernet Port on the Switch. The Managed AP(s) should be configured correctly. If you have problems connecting to the platform, please refer to the Installation Guide for more information.

B) The Managed AP(s) Power Card to the Switch and plug in the Ethernet cord to the Ethernet Port on the Switch. The Managed AP(s) should be configured correctly. If you have problems connecting to the platform, please refer to the Installation Guide for more information.

C) Connect the Ethernet cable into the Gigabit UTP (1000BASE-T/SX) port on the Switch's front panel and the other end to the Ethernet port on the computer. Verify that the LED indicator(s) is on the Switch is green.

D) Connect the Managed AP(s) to the Switch. Verify that the LED on the channel(s) port of the Switch is green.

Connecting to the Switch
