

EnGenius Technologies' EnStationAC Named Among *Commercial Integrator* Magazine's 2016 BEST

High-Powered, Long Distance 11ac Wireless Access Point/Bridge Supporting 4k Ultra High Definition Video and Flexible Deployment Options Among Key Benefits to the Integrator

LAS VEGAS – June 9, 2016 – [EnGenius Technologies](#), Inc., a leading provider of high-performance, versatile networking and telecommunications solutions for businesses and consumers, announced today its [EnStationAC](#) 11ac Wireless Access Point/Client Bridge has received *Commercial Integrator* Magazine's 2016 BEST Award this week at InfoComm Las Vegas 2016 (Booth C9339).

EnStationAC was named 2016 BEST in the Networking (Wireless, Powerline, & Coax) & Storage category. According to *Commercial Integrator*, the BEST Awards, "highlight the most outstanding new products, solutions and services that could impact the commercial integration industry in 2016." Winning products are judged based on their innovation, functionality, competitive advantages, and benefits to the installer.

"The goal of *CI* BEST Awards, as with all of *CI*'s content, is to offer information that can help integrators become more efficient and more profitable, and we think these innovative products do just that," said Tom LeBlanc, editor-in-chief of *Commercial Integrator*.

"We are honored to be recognized by *Commercial Integrator* and are proud to be a part of this impressive group of 2016's BEST," said Eric Chen, Director of Product Management for EnGenius.

Key Features and Benefits of EnStationAC

- **High Bandwidth, Fast Speeds over Long Distances** - EnStationAC offers 26dBm output power; high receive sensitivity, and an embedded high-gain 19dBi directional antenna. A narrow signal beam ensures limited interference and can extend a network over short or long distances and hard-to-reach places such as between buildings, in parks or across campuses wirelessly – without trenching or running cable. The AP/Bridge supports wireless speeds to 867 Mbps on the

5 GHz frequency band (400 Mbps at ½ mile) for accommodating 4k Ultra High Definition (UHD) video and heavy multimedia application traffic services.

- **Dual Power-over-Ethernet Ports** - Connect and power the EnStationAC via a Gigabit 802.3af/at-compliant Power-over-Ethernet port in locations where power outlets are limited or unavailable, such as under the eaves of roof, up to 328 feet from a power source. Installers can utilize the secondary Gigabit pass-through port to power up and connect a remote network device such as an IP surveillance camera or an additional access point for greater outdoor deployment flexibility.
- **Ease of Deployment** – Includes a pole- and wall-mount kit and features a 360-degree, 3-axis pivoting arm that locks in place to ensure precise alignment between other EnStationAC devices.
- **Industry-leading Flexibility** – EnStation offers three operation modes: access point, client bridge, or WDS modes in building-to-building or building-to-multi-building deployments.
- **Designed for Use in Harsh Environments** – IP55-rated waterproof and dustproof casing ensures the EnStationAC and cable ports are protected to withstand harsh outdoor climates and indoor industrial environments where temperature is a factor.
- **Simplified Monitoring and Configuration** – With EnGenius' EZ Controller™ software, EnStationAC units deployed on rooftops or other difficult-to-access locations are easily reconfigured or upgraded remotely.

The *Commercial Integrator* 2016 BEST Awards are selected by the magazine's editorial team each year and are announced at the annual InfoComm show. The awards consist of five main categories that include Audio/Video, Building Enhancements, Control & Automation, Networking & Communications, Dealer/Installer Aids, and Security with 65 sub-categories.

About EnGenius Technologies

Established in 1999, EnGenius Technologies, Inc., is a US-based industry expert in wireless communications and radio frequency (RF) technology, delivering feature-rich, long-range wireless communications technology for voice and data. The versatility and performance of the company's solutions lower total cost of ownership, increase productivity, and maximize return on investment.

EnGenius' growing portfolio of networking solutions, including Gigabit PoE switches, indoor and outdoor wireless networking products, and IP cameras for business deliver long-range connectivity, robust feature sets and versatility for class-leading performance at affordable price points.

The leader in premises mobility communications, EnGenius' cordless business telephone systems and portable handsets deliver extremely long-range and reliable connectivity outdoors, throughout multi-story buildings and in complex environments. Whether using the FreeStyl system in an office setting or the durable, scalable DuraFon system in larger, complex environments, EnGenius phone systems enhance productivity and enable mobility throughout business properties.
