

EnGenius®

Personal Cloud **Solution**

For Home & Business

Home Safer Home

An EnGenius EnGuardian Kit and the free EnGenius EnViewer mobile app lets you monitor your home, your family, or see and speak with caregivers, or pets any time of the day or night with your smartphone or tablet.

Minding Your Business

Your EnGenius EnGuardian solution is also at home in your business so you can see if your customers are being helped, your cash registers are secure, or if there's someone at the back door or loading dock when you're away.

Definable Zone Control With Sensitivity

The EDS1130 Camera lets you set precise zones (like windows and doorways) within its field of view so that it will start recording any activity or motion within those designated areas. Each zone can be customized for sensitivity.

Active Zoom

With the EnViewer app you can digitally zoom into any portion of the image or video that EnGuardian captures, up to 4x its original size.

That's Alarming

Your EnGenius Camera includes an alarm that can be enabled via the free EnViewer app. Use EnViewer to activate your camera's alarm settings from your mobile device to a sound system connected to the camera. Out of town or at work? Set up Motion Detection and Audio Alerts to trigger the audible alarm.

You've Been Notified

Something happening at your home, vacation home or business? Motion Detection and Audio Alerts are sent directly to your mobile device so you can respond accordingly.

Schedule or Instantly Record & Archive Video

Record to your “Personal Cloud” — your own attached USB hard drive connected to the EnGuardian’s EPG5000 IoT Gateway — where your recordings can be quickly retrieved and where you can keep them as long as you need them without incurring costly Internet storage subscription fees or take the risk that your videos could be hacked or compromised online.

No Internet

A **32GB** microSD card can record **18 hours** at 30fps 720p

Camera

Gateway

Internet Got You Down? No Worries.

Unlike other home security cameras that rely solely on costly subscription-based cloud storage, the EDS1130 Camera can still archive video to your own connected USB Hard Drive even if your Internet connection goes down. You can relax now.

Hard Drive

A **4TB** USB Hard Drive can record **3 months** at 30fps 720p

Find Your Videos Quicker

Each archived video is device-identified (USB Hard Drive or SD card) and date and time stamped for quicker retrieval and playback taking the guesswork out of finding the specific video you're looking for. Also easily take snapshots at any point during live streams.

Invite Others to View

Share your videos or active camera monitoring so others in your family or friends can also see what's happening in or around your home — or other employees can be assigned to monitor your business.

Two-Way Communication

With your EnGuardian solution you can use EnViewer and the Camera to see and speak with caregivers, contractors, colleagues, house sitters, petsitters, or employees in your small business.

Almost done here

How's it coming?

Add More Cameras

Need to monitor other areas of your home or business? Your EnGuardian solution supports up to 4 EDS1130 HD720P Cameras from each EPG5000 IoT Gateway. Have a vacation home? With another EnGuardian Kit, you can keep an eye on that, too and all your EDS1130 Cameras whether at home, your vacation home or your office can be grouped together in sets of four in your EnViewer app.

Computer Viewing, Too

Monitor your home, vacation home or business from a Windows-based computer with the EnGenius VMS application that lets you see up to 16 camera views at the same time. Need to monitor other locations? Buy additional EnGuardian Kits and Cameras.

Crisp High-Definition Clarity – Day or Night

The HD720P EDS1130 IP Camera included in your EnGuardian Kit delivers a high-resolution video or still images 24/7 because details are important.

High Definition for Better Detail

Voice Solution

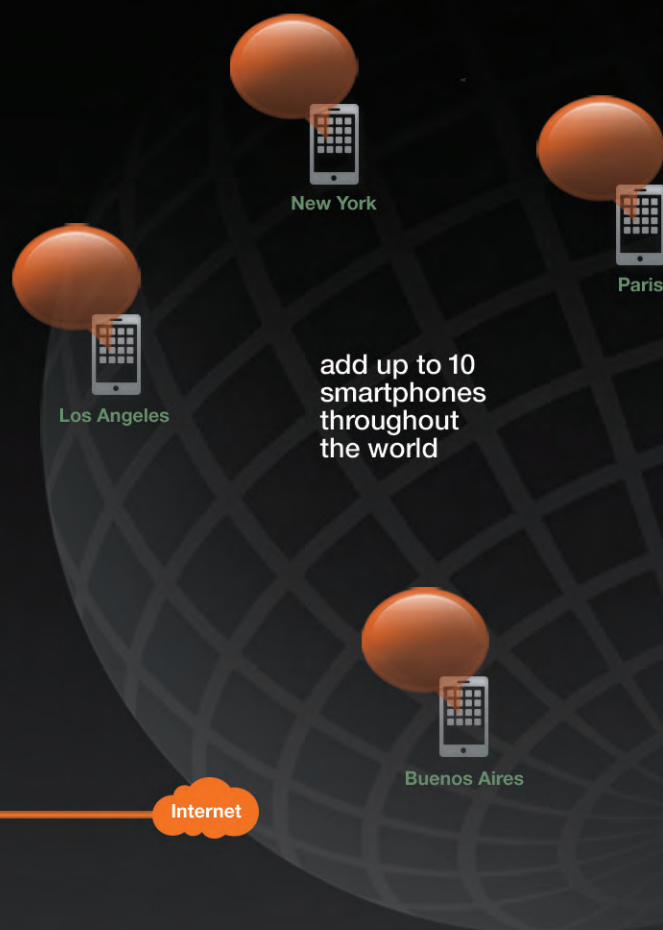

The EPG600, a Dual Band IoT Gateway with high performance Wireless N, Gigabit Ports, a USB Port, and Phone Ports. The EPG600 is part of the EnGenius Personal Cloud IoT (Internet of Things) Solution and provides a unique cost-saving communication platform for small business needs by featuring wireless speeds up to 300 Mbps on both the 2.4 GHz and 5 GHz frequency bands. When used with the free EnGenius EnTalk™ app for iPhone® or Android™ smartphones, small businesses and even families can save on international and long-distance calls whenever they have access to the Internet. The EPG600 is also a media-sharing platform offering robust streaming to computers, tablets and entertainment devices.

EPG600

How the EPG600 and EnTalk work: Saves on long-distance and international calls by attaching a PSTN line to the gateway's telephone port and after associating up to ten (10) smartphones to the gateway using the free EnGenius EnTalk app, small business users or families and friends can make calls through their local line or directly via the Internet for conducting long-distance and international calls. A telephone port on back of the EPG600 also enables connectivity to a standard phone or a DECT phone base station.

Once smartphones are registered to the EPG600, calls can be initiated and conducted directly from the EnTalk app bypassing the EPG600 owner's local telephony service account altogether. For small businesses with employees or colleagues around the globe or for families with relatives in their home country, the EPG600 and EnTalk app is a significant cost saving solution.

We've Got An App For That

But wait, there's more. To get even more out of your EnGuardian Kit, download the other free EnGenius mobile apps for you iPhone®, iPad® or Android™ smartphone or tablet and take even more control of your digital life. An EnGenius Personal Cloud IoT Solution, like EnGuardian, is designed to make your

family, your home or your small business more secure; the way you communicate effortless and less costly; your music, photos, video and documents safer and quicker to store and retrieve; and your day-to-day life more efficient — so you have even greater peace of mind.

EnShare™

EnShare lets you store and retrieve your music, photos, video and documents to and from an attached USB hard drive to your EnGenius Personal Cloud IoT Gateway (EPG5000) or Intelligent Router anywhere you go with an Internet connection. It also can instantly archive any photos you take with your iPhone, iPad or Android mobile device or whatever your EnGenius HD720P EDS1130 Wireless IP Camera captures. Access your files and media wherever you are while they're safe at home.

Android

iOS (for iPhone and iPad)

EnTalk™ Lite

With EnTalk Lite you, your family or your small business colleagues can make low-cost long-distance and international calls to anyone in the world. Capable of supporting up to 10 SIP accounts, small business owners and their teams can make and receive calls over the Internet. It's also perfect for families who want to stay in touch but need to avoid the high cost of international calling. And it's ideal for frequent overseas travelers who want to minimize roaming charges from their current telco providers.

EnRoute™

It's 10:00 PM. Do you know where your kids are? Is your spouse stuck in traffic? Need to round up your family during an emergency? Or need to find out where everyone is before the party starts? Did your employee meet the client? Is your catering team running late to the customer's house. Need to keep a record of where you ran to see if you're making progress with your workout? With EnRoute you can see where your family or your employees are when they're away from home or the office and you can store records of their routes by date and time in a USB hard drive connected to an EnGenius Personal Cloud IoT Gateway or Intelligent Router.

Personal Cloud Solutions - Products

EBK1000 EnGuardian Kit with HD720P IP Camera and Dual Band IoT Gateway

- Keep your family, home or business safer and more secure
- Built-in USB port to share media content from an attached USB hard drive to mobile devices inside or away from the home with EnShare as well as store recorded video from the EDS1130
- View live feed from connected EnGenius IP Cameras and receive alert notifications with EnViewer
- EPG5000 IoT Gateway supports IEEE802.11a/b/g/n/ac wireless standards with up to 1300 Mbps on its 5 GHz frequency band and up to 450 Mbps data rate on its 2.4 GHz band

EPG5000 Dual Band IoT Intelligent Cloud Gateway

- Built-in USB port to share media content from an attached USB hard drive to mobile devices inside or away from the home with EnShare
- Connect and talk around the globe via the Internet and save on long-distance and international calling with EnTalk-Lite
- View live feed from connected EnGenius IP Cameras and receive alert notifications with EnViewer
- Built-in 4-Port Gigabit Switch to connect Blu-ray players, Set Top Boxes, DVRs, Game Consoles and HDTVs
- Supports IEEE802.11a/b/g/n/ac wireless standards with up to 1300 Mbps on its 5 GHz frequency band and up to 450 Mbps data rate on its 2.4 GHz band
- Free Downloadable Apps for iPhone, iPad, and Android devices

EPG600 Dual Band IoT Gateway with high performance Wi-Fi & Phone Ports

- Save on long-distance and international calling
- 2 RJ11 ports to connect a small business or home's PSTN phone line
- Built-in 4-Port Gigabit Switch to connect a multitude of devices
- Free Downloadable Apps for iPhone, iPad, and Android devices
- Up to 300 Mbps wireless speed on each frequency bands
- Gigabit WAN port for faster uploads and downloads
- WPA / WPA2 Encryption

EDS1130 Intelligent Wi-Fi HD Day/Night Cloud IP Camera

- 720P High Definition Resolution
- Wireless N150 Speed
- H.264/MPEG-4/MJPEG Triple Codec; Supports 2 Simultaneous HD Streams
- Hidden IR LEDs for Night Viewing up to sixteen (16) feet.
- Free Downloadable EnViewer App for iPhone®, iPad®, and Android™ devices
- Supports Motion Detection and Push Notifications
- Built-in Microphone & External Audio Out

ESR600 Dual Band Wi-Fi N600 Intelligent Gigabit Cloud Router

- Up to 600 Mbps wireless speed with both 2.4 GHz and 5 GHz frequency bands
- Gigabit Wired Speeds and USB Port
- Free Downloadable Apps for iPhone, iPad, and Android devices
- Prioritizes Applications and Maintains Quality of Experience
- Multiple SSIDs
- Industry-Standard Security

ESR350 Wi-Fi N300 Intelligent Gigabit Cloud Router

- Wireless N300 Speed
- Gigabit Wired Speeds and USB Port
- Free Downloadable Apps for iPhone, iPad, and Android devices
- Prioritizes Applications and Maintains Quality of Experience
- Multiple SSIDs
- Industry-Standard Security

ESR300 2.4 GHz Wi-Fi N300 Intelligent Cloud Router with Fast Ethernet ports

- Wireless N300 Speed
- Fast Ethernet Wired Speeds and USB Port
- Free Downloadable Apps for iPhone, iPad, and Android devices
- Prioritizes Applications and Maintains Quality of Experience
- Multiple SSIDs
- Industry-Standard Security

Accessories

ETA1305 Wireless N300 Media Bridge/Access Point with built-in 5-Port Gigabit Switch

- Up to 300 Mbps wireless speed on the 2.4 GHz frequency band
- Gigabit Ethernet speed for optimal data throughput and enhance media streaming
- Connects up to five (5) Ethernet-enabled entertainment or office devices
- Two (2) Operation Modes: Client Bridge & Access Point
- Integrated power module design, no separate power adapter needed
- Easy Setup Wizard

EUB1200AC Dual Band Wireless AC1200 USB Adapter

- Wireless AC Speed
- USB 3.0 Speed
- Works on PCs and Macs
- Industry-Standard Security
- WPS Button for Quick Wireless Security Setup

ERB300H 4-Port Wireless N300 Media Bridge & Extender

- Repeater Mode: Extends the 2.4 GHz range of existing wireless routers
- Client Bridge Mode: Built-in four 10/100 Ethernet ports for connection of Ethernet-enabled home entertainment devices to a wireless network
- WPA / WPA2 encryption to help secure the wireless network
- Detachable 2dBi antennas for longer range and greater coverage; also allows for end-user upgrade for higher gain antennas

ERB9250 Wireless N300 Range Extender

- Wireless N300 Speed
- Extends the Reach of Your Existing Home Network
- Eliminates Wireless Dead Zones
- WPS - Push Button Setup
